Prompt Engineering is Dead, it's time for Context Engineering.

Do you remember a year or so ago, when companies were offering up to 300K USD for prompt engineering? We don't see these posts or the company anymore. Prompt engineering was kind of hacky from the start. It was the fancy way to make everyone believe that they were engineers. But now

things have changed and have taken the approach of traditional software engineering with the power of LLMs. So, let's look at the ultimate guide on how to build real agentic workflows that actually scale and don't break in production.

Table Of Contents

- Context Is Everything, Not Prompting
- Natural Language → Tool Calls
- Own Your Prompts
- Own Your Context Window
- Tools Are Structured Outputs
- Unify Execution State and Business State
- Launch, Pause, Resume: Lifecycle Management via Simple APIs
- Own Your Control Flow
- Compact Errors into Context Window
- Next Gen Agents: Modular, Accessible & Stateless Agents

The 'own your context window' point is underrated. Feels like too many teams still treat context as a dumping ground instead of something to design intentionally.
